# TAU Photocells Installation Guide

### Instructions:

Step 1: Ensure Motor is **not** plugged into an outlet.

Step 2: Open Photocells Kit and remove photocell covers. On 1 of the photocells, remove clear plastic cover and remove sticker.

Step 3: Keep sticker for your records and close up clear housing with enclosed screws.

Step 4: Continue to follow wiring diagram below.

Step 5: Install photocells w/ brackets enclosed a min. of 4" from the ground facing each other and are levelled. Close up photocells covers with screws.

Step 6: Plug Motor into an outlet.

Step 7: Ensure there is no obstructions in the way of the laser beam.

Step 8: You should hear a clicking sound when the laser beam is interrupted if installed correctly. If not, follow Steps 1-7 again.
